- Customized WordPress websites using Advanced Custom Fields, WooCommerce, and Elementor to enhance user experience and functionality leading to a 20% increase in site traffic and a 25% boost in conversion rates for e-commerce clients.
- Presented technical solution and project updates to clients, showcasing strong research and presentation skills, which improved client satisfaction by 40%.

Front End Developer | SKILLCODEHUB, Vadodara, Gujarat, India

October 2021 – June 2022

- Designed and implemented front end components using React.js, optimizing site functionality and enhancing user interaction.
- Increased site load speed by 20% through responsive UI/UX optimization.
- Collaborated with team members to resolve issues and present progress during weekly reviews.

PROJECTS

Ecommerce website using React.js and bootstrap

- S: I was responsible for developing a fully responsive e-commerce platform with React.js and Bootstrap.
- T: The task involved implementing key e-commerce features, including product management, Cart functionality, and ensuring responsiveness across devices.
- A: I utilized React hooks to optimize state management and performance, while building CRUD operations for product management and smooth shopping experience.
- R: Successfully delivered the platform with 90% PageSpeed score, enhancing site performance and user engagement by 15%.

To-Do list application

- Developed a task management app in React.js, offering real-time task updates like add, edit, delete and mark as complete.
- Integrated Node.js and MongoDB for secure user authentication and task management.
